

N2-Acetylphenelzine

Art. ID TRC-A168580-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Application Notes: N2-Acetylphenelzine is similar to Phenelzine (P295900), yet a less potent inhibitor of MAO-A and MAO-B. Phenelzine is a non-selective and irreversible monoamine oxidase (MAO) and GABA-transaminase (GABA-T) inhibitor that also increases brain GABA levels. Phenelzine is an antidepressant and anxiolytic used in the treatment of major depressive disorder (MDD) as well as other neural disorders. /// References: McKenna, K., et al.: Naunyn Schmiedebergs Arch Pharmacol, 343, 478 (1991)| McKenna, K.F, et al.: J.
