

Acetyl Vitamin B12

Art. ID TRC-A188028-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Appearance: Dark Red Solid /// Application Notes: Acetyl Vitamin B12 is a derivative of Vitamin B12 (V676020). Vitamin B12 gets converted by the body into its bioactive forms, methylcobalamin and cobamamide, which serve as enzyme cofactors. Severe deficiency may result in megaloblastic anemia and/or neurological impairment. /// References: Rickes, et al.: Science, 107, 396 (1948)| Kirschbaum, J., et al.: Anal.
