

## **(2R)-3-Acetylthio-2-methylpropionyl Chloride**

Art. ID TRC-A188675-100MG  
Unit 100 mg  
Deliverydetails No Dangerous Good

### Description

Application Notes: (2R)-3-Acetylthio-2-methylpropionyl Chloride is a reactant used in the preparation of Captopril (C175750) analogs as inhibitors of angiotensin converting enzyme. /// References: Rubin, B., et al.: Eur. J Pharmacol., 51, 377 (1978)| Hanessian, S., et al.: Bioorg. Med. Chem. Lett., 8, 2123 (1998)|
