

Acryloylglycine

Art. ID TRC-A191390-10G
Unit 10 g
Deliverydetails No Dangerous Good

Description

Category: Amines, Amino Acids and Derivatives /// Appearance: White to Off-White Solid /// Application Notes: Acryloylglycine is a vinyl monomer containing an amido and carboxylic group that is used in various industries (pharmaceutical, food, cosmetic) as a synthetic intermediate. Acryloylglycine is also used in biology to preserve the integrity of microorganisms. /// References: Barbucci, R., et al.: Polymer, 30, 1751 (1989)| Lv, Z., et al.: Acta Cryst. E: Struc. Rep.
