

3-Amino-5,6-dichloro-2-pyrazinecarboxylic Acid Methyl Ester

Art. ID TRC-A604770-10G
Unit 10 g
Deliverydetails No Dangerous Good /not restricted

Description

Category: Amines, Heterocycles, Pharmaceuticals, Intermediates and Fine Chemicals /// Appearance: Dark Yellow to Brown Solid /// Application Notes: 3-Amino-5,6-dichloro-2-pyrazinecarboxylic Acid Methyl Ester, is used for the preparation of 2-Amidino analogs of glycine-Amiloride (A578700) conjugates, acting as inhibitors of the protease urokinase plasminogen activator (uPA), a promising anticancer targets. /// References: Massey, A.
