

5-Aminoboronphthalide

Art. ID TRC-A622575-250MG
Unit 250 mg
Deliverydetails No Dangerous Good

Description

Application Notes: 5-Aminoboronphthalide is used as a reactant in the preparation of 2,1-benzoxaborole peptide isoquinoline derivatives as HCV NS3 protease inhibitors. It is also used as reactant in the synthesis of nanocarrier for chemomechanically driven guest delivery fueled by intracellular ATP. /// References: Li, X., et al.: Bioorg. Med. Chem.
