

Ammonium Molybdate Tetrahydrate

Art. ID TRC-A634050-50G
Unit 50 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: Ammonium Molybdate Tetrahydrate is a catalyst used for the hydrogen evolution reaction. Also used in the biomedical monitoring of phosphate, specifically in hemodialysis. /// References: Tang, C. et al.: ChemCatChem., 8, 1961 (2016)| Michalec, M. et al.: J. Pharm. Biomed. Anal., 126, 9 (2016)|
