

5alpha-Androst-8(14)-ene-3,17-dione

Art. ID TRC-A638125-100MG
Unit 100 mg
Deliverydetails No Dangerous Good

Description

Application Notes: 5alpha-Androst-8(14)-ene-3,17-dione is the impurity of Testosterone (T155000), which is the principal hormone of the testes, produced by the interstitial cells. Testosterone is the major circulating androgen, converted by 5alpha-reductase in androgen-dependent target tissues to 5alpha-dehydrotestosterone that is required for normal male sexual differentiation. /// References: McFarland, K., et al.: Science, 245, 494 (1989)| Heckert, L., et al.: Mol.
