

3-(Aminomethyl)-4-fluorophenol Hydrobromide

Art. ID	TRC-A616225-5G
Unit	5 g
Deliverydetails	No Dangerous Good

Description

Application Notes: 3-(Aminomethyl)-4-fluorophenol Hydrobromide is derived from 2-Fluoro-5-methoxybenzaldehyde, which is versatile reactant used in the solid-phase synthesis of BODIPY dyes and development of an immunoglobulin fluorescent sensor. /// References: Vendrell, M., et al.: Chem. Commun., 47, 8424 (2011)|
