

4-(Aminosulfonyl)-7-fluoro-2,1,3-benzoxadiazole

Art. ID	TRC-A629400-250MG
Unit	250 mg
Deliverydetails	No Dangerous Good /not restricted

Description

Category: Fluorescent Labels and Indicators, MTS and Sulfhydryl Active Reagents /// Appearance: Off-White to Pale Yellow Solid /// Application Notes: A water soluble pH dependent bifunctional fluorogenic reagent for the sensitive and specific detection of protein thiols. ABD-F is highly reactive and specific for protein thiols, and its selectivity is superior to that of other sulfhydryl-reactive fluorophores such as fluorescein maleimide, 5-iodoacetamidofluorescein, 5-I-AEDANS, dansylaziridine, and bimeane. Fluorescence: max Abs. λ = 385nm, max Em. λ = 520nm, Molar Abs. > 4.5×10^3 (ca. 315nm) /// References: Hiratsuka, T., J. Biol. Chem., 268, 24742 (1993), Treuheit, M.J., et al.: Anal.
