

Restricted Elements in Polyvinyl Chloride

Art. ID	NIST-2861
Unit	25 g
Deliverydetails	No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM) is intended primarily for use in validation of chemical and instrumental methods of analysis of polyvinyl chloride (PVC) and materials of similar matrix for restricted, additive and tramp element contents. It can be used to validate value assignment of in-house reference materials. A unit of NIST-2861 consists of one bottle containing approximately 25 g of PVC pellets. /// Sample value(s) - please ask for current certificate.
