## Corundum - particle size distribution by ISO 13320 and ISO 13322

Art. ID

ERM-FD069

40 g

Unit

Deliverydetails No Dang

No Dangerous Good /not restricted

**Description** 

ERM-FD069 is corundum material certified for the particle size distribution as determined by laser diffraction (ISO 13320) and scanning electron microscopy (ISO 13322). This material was produced following ISO Guide 34:2009 and is certified in accordance with ISO Guide 35:2006. The material consists of approximately 40 g corundum powder with a top particle size of 150 µm
