

Caffeine

Art. ID IAEA-600
Unit 0,5 g
Deliverydetails De Minimis UN1544 III E1

Description

IAEA-600 was prepared by W. Brand and R. Werner, Max-Planck-Institute for Biogeochemistry, Jena, Germany, from commercially produced pure caffeine. Its recommended delta13C value was determined in an international calibration. For this reference material the delta15N value was determined in one laboratory only and therefore is only an information value.

Text/Information	Analyte/Parameter	CAS number	Concentration/Value	Unit	Method	Source
	Caffeine	[58-08-2]
