

Abacavir Triphosphate TEA Salt

Art. ID	TRC-A105045-1MG
Unit	1 mg
Deliverydetails	De Minimis

Description

Application Note: Abacavir Triphosphate TEA Salt, is a metabolite of Abacavir. Abacavir is a carbocyclic 2'-deoxyguanosine nucleoside reverse transcriptase inhibitor and an anti-HIV drug used to treat HIV infection (1). Intracellular enzymes convert Abacavir to its active form, carbovir-triphosphate (CBV-TP), which then selectively inhibits HIV reverse transcriptase by incorporating into viral DNA (2). Abacavir is metabolized in the liver by uridine diphosphate glucuronyltransferase and alcohol dehydrogenase resulting in inactive glucuronide and carboxylate metabolites, respectively.
