

Aceclidine Hydrochloride

Art. ID TRC-A130000-100MG
Unit 100 mg
Deliverydetails De Minimis UN2811 III E1

Description

Application Note: Aceclidine is a synthetic analogue of Arecoline, a natural cholinomimetic alkaloid. Aceclidine acts as an agonist at cholinergic receptors and has therapeutic use to reduce intraocular pressure in glaucoma. A parasympathomimetic drug with weak anticholinesterase activity.
