

Okadaic acid standard solution in methanol

Art. ID	NRC-CRM-OA-d
Unit	0,5 mL
Deliverydetails	De Minimis UN1230 (6.1) II E2

Description

Each ampoule contains 0.5 mL of a solution of OA in methanol at a concentration of 17 µM. Okadaic acid (OA) is a toxin produced by marine dinoflagellates that is implicated in diarrhetic shellfish poisoning (DSP), a gastrointestinal syndrome caused by consumption of contaminated shellfish.

Text/Information	Analyte/Parameter	CAS number	Concentration/Value	Unit	Method	Source
at +20 °C	Okadaic acid (OA)	[78111-17-8]	10,4 ± 0,5	µmol/L		
at +20 °C	Okadaic acid (OA)	[78111-17-8]	8,4 ± 0,4	µg/mL		
	Okadaic acid (OA)	[78111-17-8]	10,6 ± 0,5	µg/g
