Description

Standard Reference Material (SRM®) 1577c consists of tissue derived from healthy steers. The material was collected and prepared under strict protocols designed to preserve the original composition, and to minimize contamination. NIST-1577c is intended primarily for use in evaluating the accuracy of analytical methods for selected elements and 25-hydroxyvitamin D3 in animal tissues and other biological materials. A unit of the SRM® consists of one bottle containing 20 g of freeze-dried liver powder. /// Sample value(s) - please ask for current certificate.
