

Coal fly ash - Trace and constituent elements

Art. ID	NIST-1633c
Unit	75 g
Deliverydetails	No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM®) is intended for use in the evaluation of analytical methods for the determination of constituent elements in coal fly ash or materials of a similar matrix. NIST-1633c is a bituminous coal fly ash that was sieved through a nominal sieve opening of 74 µm (200 mesh) and then blended to assure homogeneity. A unit of NIST-1633c consists of 75 g of powdered material /// Sample value(s) - please ask for current certificate.
