## Bright nickel - Hardness (Vickers)

Art. ID	NIST-1909
Unit	each

Deliverydetails No Dangerous Good /not restricted

## **Description**

This Standard Reference Material (SRM®) is intended primarily for use in calibrating Vickers-type microhardness testers and is certified for mean Vickers hardness valuers (HV) at a load of 9,81 N (0.300 kgf). NIST-1909 consists of a 1,35 cm square test block of electrodepisited bright nickel, approximately 750 µm thick, on an AISI 1010 steel substrate, mounted in an thermosetting epoxy. Hardness value is reported in gigapascal (GPa) and kgf/mm<sup>2</sup>. The SRM was indiviually measured and bears a serial number imprinted on the side of the epoxy mount. /// Sample value(s) - please ask for current certificate.
