

Urea - Nitrogen

Art. ID NIST-2141
Unit 2 g
Deliverydetails No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM®) ist certified for use in the calibration and standardization of microchemical procedures for the determination of nitrogen in organic matter. It is also useful for the standardization of techniques for the determination of nitrogen in which carbon and hydrogen are determined simultaneously. Certified value /// Sample value(s) - please ask for current certificate.

Text/Information	Analyte/Parameter	CAS number	Concentration/Value	Unit	Method	Source
	Nitrogen (N)	[7727-37-9]	46,63 ± 0,02	%
