Urea - Nitrogen

| Art. ID | NIST-2141 | | |
|-----------------|-----------------------------------|--|--|
| Unit | 2 g | | |
| Deliverydetails | No Dangerous Good /not restricted | | |

Description

This Standard Reference Material (SRM®) ist certified for use in the calibration and standardization of microchemical procedures for the determination of nitrogen in organic matter. It is also useful for the standardization of techniques for the determination of nitrogen in which carbon and hydrogen are determined simultaneously. Certified value /// Sample value(s) - please ask for current certificate.

| Text/Information | Analyte/Parameter | CAS number | Concentration/Value | Unit | Method | Source |
|------------------|-------------------|-------------|---------------------|------|--------|--------|
| | Nitrogen (N) | [7727-37-9] | 46,63 ± 0,02 | % | | |
